

TILE TODAY BUYING GUIDE

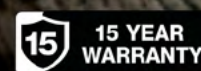

Lightweight floor & wall tile adhesive

LIGHTWEIGHT HIGH COVERAGE
IDEAL FOR SUBMERGED APPLICATIONS
LARGE FORMAT TILES & STONE
USE OVER GREEN SCREEDS
EASIER TROWEL ABILITY

NEW RELEASE

*Silica (Respirable Crystalline Fraction) levels are below the concentration limit for carcinogens (0.1%) as per schedule 6 of the Model Work Health Safety Regulations 2023.

Luminous GROUT

**Ultra Vibrant,
Efflorescence Free,
Rapid Setting Grout**

Uniquely formulated to eliminate
the chance of efflorescence

Available in 16 traditional & designer colours.

1-20mm JOINTS

INTERNAL EXTERNAL

WALL FLOOR

WATER REPELLANT

GREEN TAG CERTIFIED

15 YEAR WARRANTY

TILE TODAY BUYING GUIDE

Welcome to the first stand-alone edition of Tile Today's Buying Guide!

Tiles are beautiful, so it's understandable they get most of the attention, inside and outside of the industry.

However, industry insiders know that there is also ongoing, significant development in the products that make tiles actually useful. This includes glues, grouts, sealants and waterproofing products.

The companies that produce these products are the "quiet heroes" of the industry. They have contributed to market growth of tiles by making tiles one of the most durable, reliable flooring and decorative products on the planet.

That's quite a feat, really.

There are few places in the world where aesthetics, history and design intersect so directly with product engineering.

Tile Today's role in producing these guides is to assist people

actually laying the tiles, including preparing the surfaces, to find the very best of these products that are best suited to their needs.

Our information design comes down to three steps: using the main tables provided to find those products that suit the use case, linking to a more specific product description, and linking from there to the data sheets on the supplier's website.

The success of our previous buying guides has led us to establish these guides as an individual publication.

Among other advantages, this makes it easy for us to update the guide a couple of times a year to ensure our readers always have access to the latest and best information.

Thanks for reading the Buying Guide. We hope this contribution is useful and helpful to you in your work.

About the Cover

RLA Polymers have sponsored the cover of Tile Today's first Buying Guide. UniLite S1 and UniLite S2 are both Green Tag Certified so professional end-users can be assured these products have been comprehensively verified to achieve certification. Both feature respirable silica free technology. UniLite S1 (C2TES1) is a lightweight, non-sanded, flexible adhesive and UniLite S2 (C2TES2) is described as a premium grade, lightweight, highly flexible adhesive.

Tile Leveling Systems

Tile levelling systems can be a little deceptive. While there are any number of “white label” levellers originating in China, this doesn’t mean that there are not significant quality and design differences between brands.

In fact, it’s quite surprising just how much variety there is on the market. Different levellers are suited to different types of work, and also to the personal inclination of the tiler. They all work, in other words, but the details of how they work matter, too.

Queensland-based ACT Australia – best known as an adhesives manufacturer – takes top spot when it comes to great product design in this category. No other Australian company comes close.

The EZE-Clip wedge-based design concentrates on getting two elements correct. The first is the issue of the clip itself. There is little so frustrating as to have a clip break off while it’s being tensioned. So ACT concentrates on getting both the shape of the clip and the material it’s made from exactly right, so that it won’t break off during tensioning, but it will snap off at the base when being removed.

The second element is that ACT recognises that the useful life of the wedge is important in keeping costs down. So instead of just making the wedge out of the same material as the clips (as some manufacturers do), they use an ultra-durable Nylon.

This means the ridges on the wedges don’t get rounded off, so that when they are tensioned they click properly into place. Worn down ridges in the knurling can result in too little or too much tension.

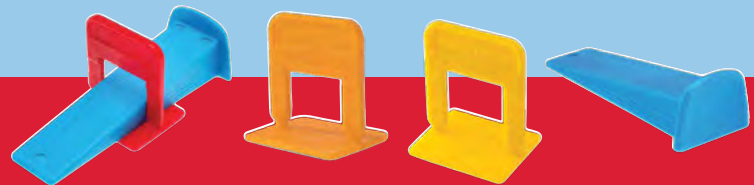

Additionally, ACT paid attention to better ergonomics. The large “thumb print” on the end of the wedge helps to reduce hand fatigue. If you set several hundred in a day, that matters.

As ACT founder Colin Morrow modestly explains:

“All I’ve done is just improve it through product design, and the manufacturing process. We’re passionate about being Australian owned but it’s getting harder to compete with cheaper made products.

“I think we’re the only adhesive company globally who has designed and manufactured their own tile and clip system.”

EZE-CLIP™
Perfection in Tile Laying Systems

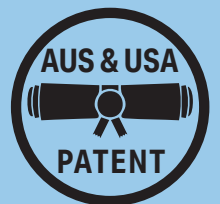

Ergonomic design, less fatigue on hands.

Strong & Flexible Clip with 'T-Post' design that breaks at base every time!

Blue Wedge Features Super Large Thumbprint, Doubles as 3mm spacer.

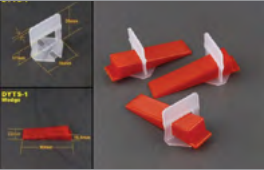

Super Durable Wedge with Passive Teeth Profile for quicker application.

Company	Product Name	Type	Widths	Heights	Corners	Max. Items	Description	Images
ACT Australia	EZE-Clip	Wedge	1.5mm, 3.0mm	5mm to 14mm 11mm to 20mm	No	1800	Australian designed and manufactured tile levelling system in this list. See page 16 for more info.	
Amark Group	Align It	Wedge	1.0mm, 1.5mm, 2.0mm, 3.0mm	3mm to 12mm 12mm to 20mm	No	2000	Amark makes a standard clip-and-wedge levelling system.	
Ding Yue Plastic Electronic	DYTS	Wedge	1.0mm, 1.5mm, 2.0mm, 2.5mm, 3.0mm	3mm to 12mm 6mm to 15mm	No	350	Ding Yue makes a standard clip-and-wedge levelling system. Frequently re-branded.	
LevTec	LevTec Tiling Systems	Wedge	1.0mm, 1.5mm, 3.0mm	N/A	No	3000	LevTec makes a standard wedge system.	
Mapei	MapeLevel EasyWDG System	Wedge	0.5mm, 1.0mm, 1.5mm, 2.0mm, 3.0mm, 4.0mm, 5.0mm	3mm to 12mm	No	250	MapeLevel EasyWDG System wedges are 114mm long by 16mm wide.	
Mapei	MapeLevel ProWDG System	Wedge	0.5mm, 1.0mm, 1.5mm, 2.0mm, 3.0mm, 4.0mm, 5.0mm	3mm to 12mm 12mm to 20mm	No	250	MapeLevelProWDG System offers wider wedges and more durability.	
Mapei	MapeLevel Easy System	Cap	1.0mm, 1.5mm, 2.0mm, 3.0mm, 5.0mm	3mm to 21mm	Yes, T and X	100	MapeLevel Easy System is a standard cap system, except that the caps have an oblong "handle" on them, which may improve ergonomics.	
Mapei	MapeLevel EasyClick System	Cap	1.0mm, 1.5mm, 2.0mm, 3.0mm, 5.0mm	3mm to 21mm	Yes, T and X	100	An adaptation of the Easy System with a button release on the caps.	
Perfect Level Master	T-Lock Tile Levelling System	Wedge	1.0mm, 2.0mm, 3.0mm	N/A	No	300	A wedge system that includes a shield that goes under the wedge to protect the tile surface.	
Klassen Bronze	Peygran	Wedge	0.5mm, 1.0mm, 2.0mm, 3.0mm	3mm to 12mm 12mm to 30mm	No	4000	The Peygran system comes in two sizes, Classic and Compact, and features a shield to protect the tile surface.	

Company	Product Name	Type	Widths	Heights	Corners	Max. Items	Description	Images
QEP	LASH	Wedge	1.0mm, 2.0mm, 3.0mm	3mm to 12mm	No	4800	The basic LASH system is a relatively standard wedge.	
QEP	Xtreme	Wedge	1.0mm, 2.0mm, 3.0mm	3mm to 12mm	No	4800	The Xtreme system is slightly wider and more robust than LASH.	
QEP	LASH360	Cap	1.5mm	3mm to 19mm	Yes, T and X	100	LASH360	
Raimondi	R.L.S. Vite	Cap	1,0mm , 1.5mm, 2.0mm, 3.0mm	3mm to 15mm 14mm to 26mm	Yes, T and X	300	Standard cap system, but also included non-stick washers, and Vitexpress power tool attachment.	
Raimondi	R.L.S. Wedge	Wedge	0.5mm, 1.0mm, 1.5mm, 2.0m, 3.0mm, 4.8mm	3mm to 12mm	No	2200	Wedge system in regular and HD (heavy duty). Includes under-wedge shield.	
RUBI	Delta	Wedge	0.5mm, 1.0mm, 1.5mm, 3.0mm	3mm to 12mm 11mm to 20mm	No	2400	Delta is a typical wedge-based system.	
RUBI	Cyclone	Cap	1.0mm, 1.5mm, 2.0mm, 3.0mm	3mm to 20mm	Yes, T and X	2400	Cyclone is a typical cap system.	
RUBI	Quick	Cap and strap	1.5mm	3mm to 16mm	No	2400	Quick is a cap-and-strap system.	
RUSO	Spin Doctor	Cap	1.0mm, 1.5mm, 3.0mm, 5.0mm	3mm to 20mm	Yes, T and X	1800	A popular brand in the US, Spin Doctor includes a shield to prevent tile marring.	
Tuscan	Seam Clip	One-piece	0.8mm	3mm to 12mm	No	500	A unique one-piece system.	

Everyone could use a bit of guidance.

At Tile Today Digital, we constantly look for the information the tile industry needs — from the latest ABS stats, to product releases, new trends in design, and building requirements. We also highlight the people who make the tile industry what it is.

We publish that information on our website, at tiletodaydigital.com.au.

Once a month, we package up links to the most important articles, and send those to you in an e-newsletter.

It's that simple.

ACT AUSTRALIA

VIEW DATA SHEET

ADH-77 Soundflex Highly Flexible Soundproof C2TS2

A premium soundproof, highly flexible, lightweight, high strength, fast setting commercial tile adhesive. ADH-77 is a unique one-part soundproof adhesive which exceeds the BCA requirements for impact sound control in residential apartment buildings.

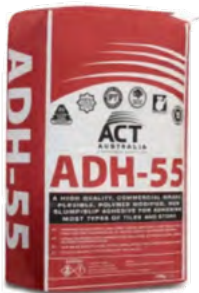

VIEW DATA SHEET

ADH-66 Light Premium Lightweight C2ETS2

ADH-66 Light is a premium lightweight, flexible, very high strength white tile adhesive for all internal and external wall and floor applications including swimming pools. ADH-66 Light has a super light feel on the trowel & is suitable for supporting subway tiles through to large format. ADH-66 Light has great non slump properties and will support heavy large format tiles/stone.

VIEW DATA SHEET

ADH-55 Premium Polymer Modified C2ETS2

ADH-55 is a premium, commercial grade, high strength, flexible, quality, polymer modified cement-based Tile Adhesive. Used for internal and external applications over concrete, green screed, cement render, fibre cement sheeting & plasterboard. ADH-55 is suitable for tiling commercial heavy traffic applications, driveways, external cladding. It can also be used in swimming pools as an adhesive & light grey grout system.

VIEW DATA SHEET

ADH-33 Premium Rubber Modified C2ETS1

ADH-33 is a premium rubber & polymer modified flexible tile adhesive used for wall & floor applications. Recommended over concrete, green screed, cement render, fibre cement sheeting, plasterboard as well as ACT approved under tile waterproofing membranes. ADH-33 is suitable for internal & external applications including bathrooms, laundries, kitchens, existing tiles, decks & verandahs.

VIEW DATA SHEET

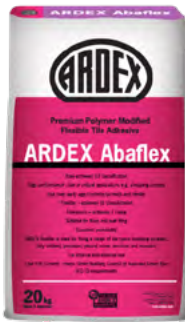

ADH-44 Premium Powder Mastic C2ETS1

ADH-44 is a premium, flexible, high strength non-slip/non slump, powder mastic style tile adhesive. Used for internal and external wall & floor tiling applications. Suitable for tiling over concrete, sand cement screeds, cement render, fibrous cement sheeting, plasterboards as well as tiling over existing tiles. ADH-44 is ideal for large format tiles including rectified edge tiles.

ARDEX AUSTRALIA

VIEW DATA SHEET

Abaflex

ARDEX Abaflex is a premium grade, cement-based wall and floor tile adhesive, with excellent flexibility and is cured enough to be grouted after 8 hours. Suitable for internal and external use with superior workability is ideal for fixing fully vitrified, porcelain, mosaics and non-moisture sensitive natural stone tiles. ARDEX Abaflex accommodates shrinkage movement associated with early age concrete and screeds and be used over concrete that is at least 7 days old and screeds and renders after 16 hours

VIEW DATA SHEET

X52

ARDEX X52 is a rubber modified adhesive for fixing ceramic tiles in internal and external (with satisfactory falls) situations. It can be used over render, plasterboard, fibre-cement sheet and concrete in situations where minimal movement is anticipated. Ideal for fixing ceramic, fully vitrified, porcelain, non-moisture sensitive natural stone tiles and mosaics

VIEW DATA SHEET

CA20P Plus White

ARDEX CA20P Plus is a one component, silane modified polymer adhesive and neutral curing sealant which hardens in reaction with moisture. It is ideal as a general shower, kitchen and bathroom repair adhesive and sealant for replacing tiles, fitting accessories such as soap holders and finishing off joints. Its shrinkage free drying and ability to be used internally and externally on walls and floors adds to the versatility of ARDEX CA20P Plus.

VIEW DATA SHEET

D5

ARDEX D5 is a white, ready mixed, thin bed, interior wall tile adhesive. Being a smooth, viscous paste, ARDEX D5 is easy to trowel. It can be used to fix a range of tiles including ceramic tiles, non moisture sensitive natural stones, mosaics and translucent tiles in kitchens, bathrooms and laundries.

VIEW DATA SHEET

Isoflex Two Part Kit

ARDEX Isoflex is a two component, rubber based wall and floor tile adhesive. It is especially formulated to fix tiles over sheeted particleboard or plywood timber (internal), fibre-cement sheets and concrete (internal and covered external) where the substrates are subject to thermal and shrinkage movement. ARDEX Isoflex is suitable for both internal and covered external use. For industrial and commercial applications use on the wall only.

ARDEX AUSTRALIA

VIEW DATA SHEET

MPP Powder

ARDEX MPP is a cementitious mastic ceramic tile adhesive. It combines the properties of a mastic adhesive with a cement based adhesive. ARDEX MPP is especially suited to applications requiring minimum delay between the tiling and grouting operations and is ideal for translucent tiles such as marble (excluding moisture sensitive stone) and glass mosaics in internal wall and floor applications.

VIEW DATA SHEET

Optima Kit

ARDEX Optima is a premium premium grade two component wall and floor tile adhesive with exceptional adhesion qualities. The unique formula enables it to be used over many difficult substrates including sheet timber flooring. ARDEX Optima is suitable for all types of ceramic tiles and moisture insensitive natural stone on internal or external, wall and floor applications and is also suitable for continuous immersion applications such as swimming pools

VIEW DATA SHEET

Quickbond

ARDEX Quickbond is a fast setting, polymer modified wall and floor tile adhesive, which has been specially formulated to have an extended pot life and fast setting characteristics, making ARDEX Quickbond ideal for situations where the tiled area needs to be accessed or grouted within a few hours of the tiles being fixed.

VIEW DATA SHEET

D2

ARDEX D2 is a premium grade dispersion adhesive offering superior non slump and shear adhesion characteristics. Based on exclusive polymer technology, ARDEX D2 is the ultimate performance wall tile adhesive and is suitable for interior use, over a range of substrates and for most tile types. ARDEX D2 is not recommended for use on external floors or in continuous immersion applications e.g. swimming pools.

VIEW DATA SHEET

WA 100 Kit

ARDEX WA100 is a high strength, creamy white, two part epoxy stone adhesive that exhibits superior bond strength. It is specially designed for the fixing of natural stone such as marble and granite, including those sensitive to moisture, on vertical surfaces such as walls and overheads in interior and exterior applications. It is also ideal for large format ceramic and porcelain tiles. ARDEX WA100 can also be used for the fixing and beddi

ARDEX AUSTRALIA

VIEW DATA SHEET

X18 White

ARDEX X18 is a superior polymer fortified cement-based wall and floor tile adhesive that has been specially formulated with mastic type properties, available in both white and grey. It contains specially developed fibres that add strength to the tiled area. ARDEX X18 has an extended open time, is non slump and flexible. Mix with water to achieve a mortar suitable for internal and external use in residential and commercial applications, including swimming pools

VIEW DATA SHEET

X32

ARDEX X32 Natural Stone adhesive is a rapid hardening and drying, cement based adhesive for fixing natural stone floor and wall tiles including moisture sensitive natural stone tile and uncalibrated natural stone floor tiles. ARDEX X32 is suitable for use in situation where: The adhesive bed has to dry quickly to reduce the risk of moisture staining of the stone, can be applied up to 30mm thickness in a single application and ready for foot traffic and grouting in 3 hours.

VIEW DATA SHEET

X44 Tropical Glue

ARDEX X44 Tropical Glue is a rubber modified wall and floor tile adhesive for fixing ceramic tiles in internal and external situations (with satisfactory falls). It can be used over render, plasterboard, fibre cement sheets and concrete in situations where minimal movement is anticipated.

VIEW DATA SHEET

X56

ARDEX X56 is a fast setting, polymer modified highly flexible adhesive. This flexibility makes the adhesive suitable for tiling directly to sheet timber and concrete substrates subject to thermal/shrinkage movement without the addition of additives. ARDEX X56 is ideal for quick turnaround applications owing to its fast drying formulation and compatibility with early age concrete and renders/screeds

VIEW DATA SHEET

X7

ARDEX X7 is a white cement-based wall and floor tile adhesive. ARDEX X7 has an extended open time and is non slump. Mix with water to achieve a mortar suitable for use on walls and floors in internal areas and externally or commercially when mixed with ARDEX E90. Mix with diluted ARDEX E90 when tiling externally and where movement is anticipated and in commercial applications.

ARDEX AUSTRALIA

VIEW DATA SHEET

X10

ARDEX X10 is a white polymer fortified cement-based wall and floor tile adhesive that has been specially formulated with mastic type properties. ARDEX X10 has an extended open time, is non slump and flexible. Mix with water to achieve a mortar suitable for internal and external use in residential and light commercial applications.

VIEW DATA SHEET

X17

ARDEX X17 is a polymer fortified cement-based wall and floor tile adhesive that has been specially formulated with mastic type properties. ARDEX X17 has an extended open time, is non slump and flexible. Mix with water to achieve a mortar suitable for internal and external use in residential and light commercial applications.

VIEW DATA SHEET

X68

ARDEX X68 is a superior white polymer fortified cement-based wall and floor tile adhesive, that has been specially formulated to offer extended coverage and with low weight for ease of transporting, mixing, and spreading of the tile adhesive. ARDEX X68 has an extended open time, is non slump and flexible. Mix with water to achieve a mortar suitable for internal and external use in residential and commercial applications, including swimming pools

VIEW DATA SHEET

X77

ARDEX X77 is a high performance, fibre reinforced, polymer modified wall and floor tile adhesive, which has been specially formulated with Microtec Technology to give exceptional properties of adhesion. ARDEX X77 is suitable for use in both internal and external applications, has a reduced risk of efflorescence due to the addition of special additives and is also ideal for use in wet areas and swimming pools

DRIBOND CONSTRUCTION CHEMICALS

VIEW DATA SHEET

CEMFLEX

CEMFLEX is a C2 S1 polymer-modified, rubber-based, fast-setting, cementitious tile adhesive for bonding ceramic and stone tiles to porous and non-porous surfaces.

VIEW DATA SHEET

ACOUSTIBOND

ACOUSTIBOND is a water-resistant, acrylic/rubber crumb, ceramic, porcelain and stone tile adhesive with soundproofing properties. It's a C2S2 with soundproofing properties that exceeds the acoustic requirements of the BCA.

VIEW DATA SHEET

DRYMASTIC

DRYMASTIC is a C2S1ET white, polymer-modified, flexible, cement-based adhesive with non-shrink and non-slip/ slump properties for fixing vitrified, porcelain, stone, marble and mosaic tiles.

VIEW DATA SHEET

ELASTACRETE + KEMGRIP FLOOR & WALL

ELASTACRETE is a flexible acrylic additive for KEMGRIP FLOOR & WALL. ELASTACRETE replaces water in KEMGRIP FLOOR & WALL to make an adhesive that has flexibility, strength, improved bond strength and is chemical, vibration and shock resistant.

VIEW DATA SHEET

DURAFLEX

DURAFLEX is C2S1ET polymer-modified, rubber-based, cementitious adhesive for bonding ceramic, porcelain and stone tiles to porous and non-porous surfaces.

DRIBOND CONSTRUCTION CHEMICALS

VIEW DATA SHEET

FASTFLEX

FASTFLEX is a one-part, fast-setting, flexible tile adhesive. A fast-setting, flexible, polymer-modified, cement-based adhesive. It is formulated for fixing porous and non-porous tiles, porcelain tiles and natural stone over sound concrete, Dribond Construction Chemicals waterproofing membranes, where there is a need for tiling and grouting in 4 hours and put into full traffic in 6 hours.

VIEW DATA SHEET

GRIPFLEX

GRIPFLEX is a premium, flexible, white, mastic adhesive. GRIPFLEX is a polymer-modified, water-resistant, cement-based adhesive for bonding ceramic, porcelain and stone tiles to porous and non-porous surfaces subject to vibration and thermal movement.

VIEW DATA SHEET

HYDRALITE

HYDRALITE is a premium, white or grey, multipurpose, flexible, polymer-modified, tile adhesive suitable for permanently immersed applications using lightweight technology.

VIEW DATA SHEET

HYDRABOND

HYDRABOND is a premium, white, multipurpose, polymer-modified adhesive suitable for permanently immersed applications.

VIEW DATA SHEET

KEMFLEX (2:1)

KEMFLEX 2:1 is a two-pack, flexible, general purpose, internal and external, floor and wall adhesive, suitable for thin or thick bed application on surfaces subject to vibration and temperature fluctuation movement, and heated floors.

DRIBOND CONSTRUCTION CHEMICALS

VIEW DATA SHEET

KEMGRIP SUPER

KEMGRIP SUPER is a waterproof ceramic tile adhesive with extra grip. A cement powder-based adhesive formulated to be mixed with water. A thick or thin bed adhesive for bedding and fixing ceramic and porcelain tiles to firm masonry surfaces. A waterproof, floor and wall adhesive, off-white in colour, for when extra grip or non-slip properties are required. KEMGRIP SUPER requires KEM-CRETE for immersed and/or vitrified tiles.

VIEW DATA SHEET

MIGHTYMASTIC

MIGHTYMASTIC is a C2S1ET, white, polymer-modified, non-sanded, flexible, cement-based adhesive with non-shrink and non-slip/slump properties and exceptional creamy mastic qualities for fixing vitrified, porcelain, stone, marble and mosaic tiles.

VIEW DATA SHEET

MONOFLEX

'When failure is not an option'. MONOFLEX is a C2S2ET, premium, water-resistant, flexible, rubber-based, fast-setting, cementitious adhesive for bonding ceramic and stone tiles to porous and non-porous surfaces subject to vibration and thermal movement.

VIEW DATA SHEET

MONOLITE

'When failure is not an option'. MONOLITE is a C2S2ET, premium, water-resistant, flexible, rubber-modified, lightweight, fast-setting, cementitious adhesive for bonding ceramic and stone tiles to porous and non-porous surfaces subject to vibration and thermal movement.

VIEW DATA SHEET

RAPIDFIX

RAPIDFIX is a fast-setting, two-pack adhesive. A two-component, rapid-drying, cement-based adhesive for stone and composite tiles that are affected by moisture and require a rapid-drying adhesive (available in white and grey).

DRIBOND CONSTRUCTION CHEMICALS

VIEW DATA SHEET

MOSAICBOND

MOSAICBOND is a flexible, glass mosaic adhesive/grout for use with KEMGROUT FLEXIBLE or KEMGROUT SANDED. A premium grade, internal and external, floor and wall adhesive with exceptional performance. MOSAICBOND is formulated to allow the bonding and grouting (2mm-4mm joints) of mosaics tiles. Can be used on many different surfaces i.e. fibre cement sheet, plasterboard, concrete, ceramic tiles and smooth concrete.

VIEW DATA SHEET

SUREFIX

SUREFIX is a white premixed, economical, thin bed, acrylic based ceramic tile adhesive.

VIEW DATA SHEET

TILEMASTIC

TILEMASTIC is a premium, white, premixed, water-resistant, flexible, wall tile adhesive with excellent non-slip properties and bond strength.

VIEW DATA SHEET

ULTIMA

ULTIMA is a two-pack, white, premium grade, internal and external, floor and wall adhesive with exceptional adhesive performance. Ultima can be used on many different substrates such as, metal, glazed ceramic tiles, steel trowelled concrete.

KERAKOLL

VIEW DATA SHEET

Biofix

Mineral adhesive with an extremely low chemical additive content for high performance bonding with no vertical slip and long open time. Suitable for ceramic & large format porcelain tiles mosaics & natural stone.

VIEW DATA SHEET

Bioflex S1

Highly deformable mineral adhesive with an extremely low chemical additive content for high performance bonding with no vertical slip and long open time. Suitable for ceramic & large format porcelain tiles mosaics & natural stone. Facades, Swimming pools, fountains, saunas & spa's.

VIEW DATA SHEET

Biofast

Rapid (fast) setting mineral adhesive with an extremely low chemical additive content for high performance bonding with no vertical slip and long open time. Suitable for ceramic & large format porcelain tiles mosaics & natural stone.

VIEW DATA SHEET

Universal Eco

Ready-to-use organic mineral adhesive for high adhesion, high-performance laying with no vertical slip. Solvent-free and with very low volatile organic compound emissions. Universal eco has no vertical slip and develops a long adjustability time which means ceramic tiles can also be laid diagonally, from top to bottom, without having to use spacers.

VIEW DATA SHEET

BioGel No Limits

Exclusive Kerakoll geo-binder based, structural flexible multi-purpose adhesive-gel for bonding all types of material, on all substrates, and for all use, even in extreme conditions. Eco-friendly. Shape memory, non-slumping with high deformation and no vertical slip & no shrinkage Ideal for Swimming pools, fountains, saunas & spas, Marble - Natural stone, recomposed material and glass tiles.

VIEW DATA SHEET

BioGel Revolution

Rapid setting Kerakoll geo-binder based, structural flexible multi-purpose adhesive-gel for bonding all types of material, on all substrates, and for all use, even in extreme conditions. Eco-friendly. Shape memory, non-slumping with high deformation and no vertical slip & no shrinkage specifically designed for facades and for all moisture sensitive stone (marble - natural stone). Ideal for recomposed material including Terrazzo and glass tiles for all applications including swimming pools, fountains, saunas & spas.

BioGel Extreme

Highly deformable and workable, hybrid gel adhesive, bonds everything and is tested under the most extreme working conditions. Adhesive strength 5 times superior to a class C2 (4.5 N/mm²) cement-based adhesive after 24 hours. 5 times less viscous than a (35 Pa*s) polyurethane adhesive, transforms into a smooth gel like a cement based adhesive.

LATICRETE AUSTRALIA

VIEW DATA SHEET

254

254 adhesive is the ultimate one-step, polymer fortified, thin-set mortar for interior and exterior installation of ceramic tile, stone, quarry tile, pavers and brick.

VIEW DATA SHEET

315

315 Adhesive is a high performance thin-set adhesive to install tile and stone using the thin-bed method of installation.

VIEW DATA SHEET

335

335 adhesive is a premium, flexible, high performance thin-bed adhesive for installing a wide range of tiles and stone including low absorption ceramic tile, porcelain tile, natural and manufactured stone using thin-set method of installation.

VIEW DATA SHEET

211 + 4237 Latex Additive

211 is a factory prepared blend of carefully selected raw materials, Portland cement and graded aggregates, designed for use with 4237 Latex Additive to produce a high strength adhesive for ceramic tile and stone that meets and exceeds the requirements of national and international standards.

VIEW DATA SHEET

257 TITANIUM™

The ultimate, sand free, lightweight, polymer fortified, thin-set adhesive for the installation of ceramic, stone and glass tiles.

LATICRETE AUSTRALIA

VIEW DATA SHEET

335 LITE

335 LITE is a premium, sand free, lightweight, high performance thin-set adhesive for the installation of large format ceramic, porcelain & stone tile.

VIEW DATA SHEET

335 RAPID

335 RAPID is a premium, flexible, high performance, rapid setting thin-bed adhesive for installing a wide range of tiles and stone. Excellent for cold weather applications

VIEW DATA SHEET

LATAFLEX Gold

LATAFLEX Gold Adhesive is a superior performance polymer fortified, rubber reinforced thin-set adhesive for installing ceramic tile and stone using the thin-bed method of installation

VIEW DATA SHEET

LATAPOXY® 300 Adhesive

LATAPOXY® 300 Adhesive is a chemical resistant, epoxy adhesive that will bond to most sound, clean surfaces. The adhesive spreads easily and cleans with water while fresh.

VIEW DATA SHEET

LATAPOXY® 310 Stone Adhesive

LATAPOXY® 310 Stone Adhesive is a two component, high strength epoxy adhesive, which is formulated for spot bonding fixing method of tile and stone installations on vertical surfaces.

LATICRETE AUSTRALIA

VIEW DATA SHEET

MULTIFLEX

MULTIFLEX Adhesive is an economical, flexible, rubber and polymer fortified cementitious powder-based thin set adhesive for installing ceramic tile and stone to floors and walls.

VIEW DATA SHEET

LATAPOXY® 310 RAPID Stone Adhesive

LATAPOXY® 310 Rapid Stone Adhesive is a two component, high strength epoxy adhesive. Engineered, formulated and optimised for the spot bonding fixing method of installing tile and stone on vertical surfaces.

VIEW DATA SHEET

Multimastic Premium Adhesive

Multimastic Premium Adhesive is a white, non-flammable, ready to use latex adhesive designed for interior installations of ceramic tile and natural stone on both floors and walls.

VIEW DATA SHEET

MVIS™ Veneer Mortar

MVIS™ Veneer Mortar is a patented, versatile polymer fortified mortar designed specifically for the installation of adhered masonry veneer, stone and thin brick.

VIEW DATA SHEET

ULTRA X8

ULTRA X8 is a polymer fortified, flexible, creamy and smooth to trowel thin-set adhesive for installing all types of tile and stone over a wide range of surfaces.

RLA POLYMERS

VIEW DATA SHEET

Tilebond Extra

Tilebond Extra is a super grade, white cement based adhesive suitable for bonding most types of ceramic, stone and mosaic tiles for internal and external applications (with the exception of green marble and moisture sensitive stones) and over RLA approved waterproofing membranes when mixed with RLA Uniflex Additive.

VIEW DATA SHEET

RLA Unigrip

Unigrip is a premium grade, polymer modified white cementitious adhesive suitable for installing most types of tiles (not moisture sensitive) for internal and external applications, walls & floors. It carries a high C2S2ET rating which allows for low lipping, slumping and slippage installations.

VIEW DATA SHEET

RLA Mastik

RLA Mastik is a high quality, yet economical, flexible polymer modified adhesive with great mastik properties for bonding most types of ceramic and porcelain tiles (with the exception of moisture sensitive stone and marble) over concrete, cement render, rendered brick and blockwork, gyprock, plasterboard, fibre cement sheeting and RLA approved waterproofing membranes.

VIEW DATA SHEET

RLA Moreflex

Moreflex is an economical, rubber filled, flexible polymer modified adhesive with great non slump properties for bonding most types of ceramics and porcelain tiles (with the exception of moisture sensitive stone and marbles) over concrete, cement render, rendered brick and blockwork, gyprock, plasterboard, fibre cement sheeting & RLA approved waterproofing membranes.

VIEW DATA SHEET

RLA Tileflex

RLA Tileflex is a premium grade, rubber filled, flexible polymer modified adhesive with great non slump properties for bonding most types of ceramic and porcelain tiles (with the exception of moisture sensitive stone and marble) over concrete, cement render, rendered brick and blockwork, gyprock, plasterboard, fibre cement sheeting & RLA approved waterproofing membranes.

VIEW DATA SHEET

RLA Addflextra

Addflextra is a Premium grade High yield, rubber modified flexible white cement based tile adhesive designed for bonding most types of ceramic, mosaic, (Stone note moisture sensitive) to a variety of substrates such as rendered blockwork, gyprock, plaster board and cement sheet, Addflextra can also be used to bond to RLA Approved membranes.

RLA POLYMERS

VIEW DATA SHEET

RLA Trade Mastik

RLA TRADE MASTIK is an off white, polymer modified cement-based tile adhesive suitable for internal and external wall and floor tiling. Trade Mastik provides an economical adhesive option that displays good adhesion, flexible and non-slump properties

VIEW DATA SHEET

RLA Fastset

RLA FastSet tile adhesive is a grey, fast setting, high bond strength, polymer modified cementitious adhesive designed for rapid installation of tile and stone. It is suitable for stone of low moisture sensitivity and installations can be grouted and put into service in one day. No additive required as it is already a S1

VIEW DATA SHEET

RLA Stoneset

RLA StoneSet tile adhesive is a very high quality, rapid setting white polymer modified cementitious adhesive designed for low to Medium moisture sensitive stone and tiles. StoneSet has a unique chemically controlled setting and hydration process that protects against excessive moisture transmission to sensitive materials. No additive required as it is already a S1.

VIEW DATA SHEET

RLA Polymastic

Poly Mastic is a "ready to use" premixed adhesive for internal walls only. High grade, non slip, acrylic based, white, flexible ceramic tile adhesive suitable for most ceramic tiles, Not for moisture sensitive stone or tile. Specially designed for larger wall tiles and suitable for use over plasterboard, gyprock, fibre cement sheet, and rendered brick and blockwork.

VIEW DATA SHEET

RLA Unilite S1

RLA UNILITE S1 is a premium grade cementitious floor and wall tile adhesive featuring respirable silica free technology. Combining super lightweight fillers and the latest polymer advancements, Unilite S1 offers significantly higher yields and extended coverage compared with regular sand/cement blends. The unique formulation delivers exceptional workability, material consistency and general ease of use to make a Unilite S1 versatile, high performance solution for a broad range of tiling applications.

RLA POLYMERS

VIEW DATA SHEET

RLA Unilite S2

RLA UNILITE S2 is a high yield, highly deformable floor and wall tile adhesive combining respirable silica free and unique lightweight technology. Delivering exceptional workability and overall performance, Unilite S2 offers versatility for a broad range of standard and specialised tiling applications including large format tiling, timber floors and immersed applications.

SIKA AUSTRALIA

VIEW DATA SHEET

410 Secure Set

A multi-purpose sand and silica free white tile and stone adhesive with Dust Less technology that reduces airbourne dust during mixing by up to 80%.

VIEW DATA SHEET

405 Lite

A flexible, premium, sand and silica free, tile and stone adhesive with Lightweight Glass technology for a smooth, easy to trowel application.

VIEW DATA SHEET

440 Opti-Cure

A rapid setting tile and stone adhesive with Dust Less technology that reduces airbourne dust during mixing by up to 80%.

VIEW DATA SHEET

510 Mega Lite

A light weight, silica free, cement-based flexible tile adhesive that provides ultimate performance formulated with Lightweight Glass technology.

VIEW DATA SHEET

400 Evo Pro

A flexible, cement-based tile adhesive designed for natural stone, porcelain and mosaics and equipped with Dust less Technology.

VIEW DATA SHEET

366 Pro Flex

A premium rubber modified, cement-based tile adhesive with extended coverage and flexible performance.

VIEW DATA SHEET

366 Pro Flex

A fine white, polymer fortified, flexible, sand and silica free, cement-based tile adhesive suitable for tile and stone internal wall tiling applications.

VIEW DATA SHEET

350 Pro Maxset - Grey

A flexible cement-based tile adhesive with Dust Less Technology design for large format tile installations.

VIEW DATA SHEET

350 Pro Maxset - White

A flexible cement-based, free from respirable crystalline silica, tile adhesive with Dust Less Technology design for large format tile installations.

TPA

VIEW DATA SHEET

TPA 401M

TPA 401M is a white, flexible, powdered adhesive for wall and floor applications. It has superior anti-slip properties, easily holding 600mm x 600mm wall tiles on vertical surfaces.

VIEW DATA SHEET

TPA 501R

TPA 501R is a cost-effective, high-coverage, flexible, powdered adhesive for wall and floor applications.

VIEW DATA SHEET

TPA 301R

TPA 301R is a cost-effective, flexible, powdered adhesive for wall and floor applications.

VIEW DATA SHEET

TPA Lite

TPA Lite is a premium grade, white, fibre-reinforced, flexible cement-based tile adhesive, based on a lightweight formulation.

VIEW DATA SHEET

TPA 201M

TPA 201M is a cost-effective, pre-mixed, white, flexible tile adhesive, suitable for most internal thin bed wall applications.

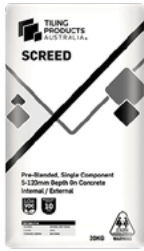

VIEW DATA SHEET

TPA Rapid

TPA Rapid is a high-quality, cost-effective, rapid-setting, polymer-modified, grey cement-based tile adhesive. Ideal for use in situations where the adhesive must dry quickly or when grouting must be completed shortly after fixing tiles.

VIEW DATA SHEET

TPA Screed

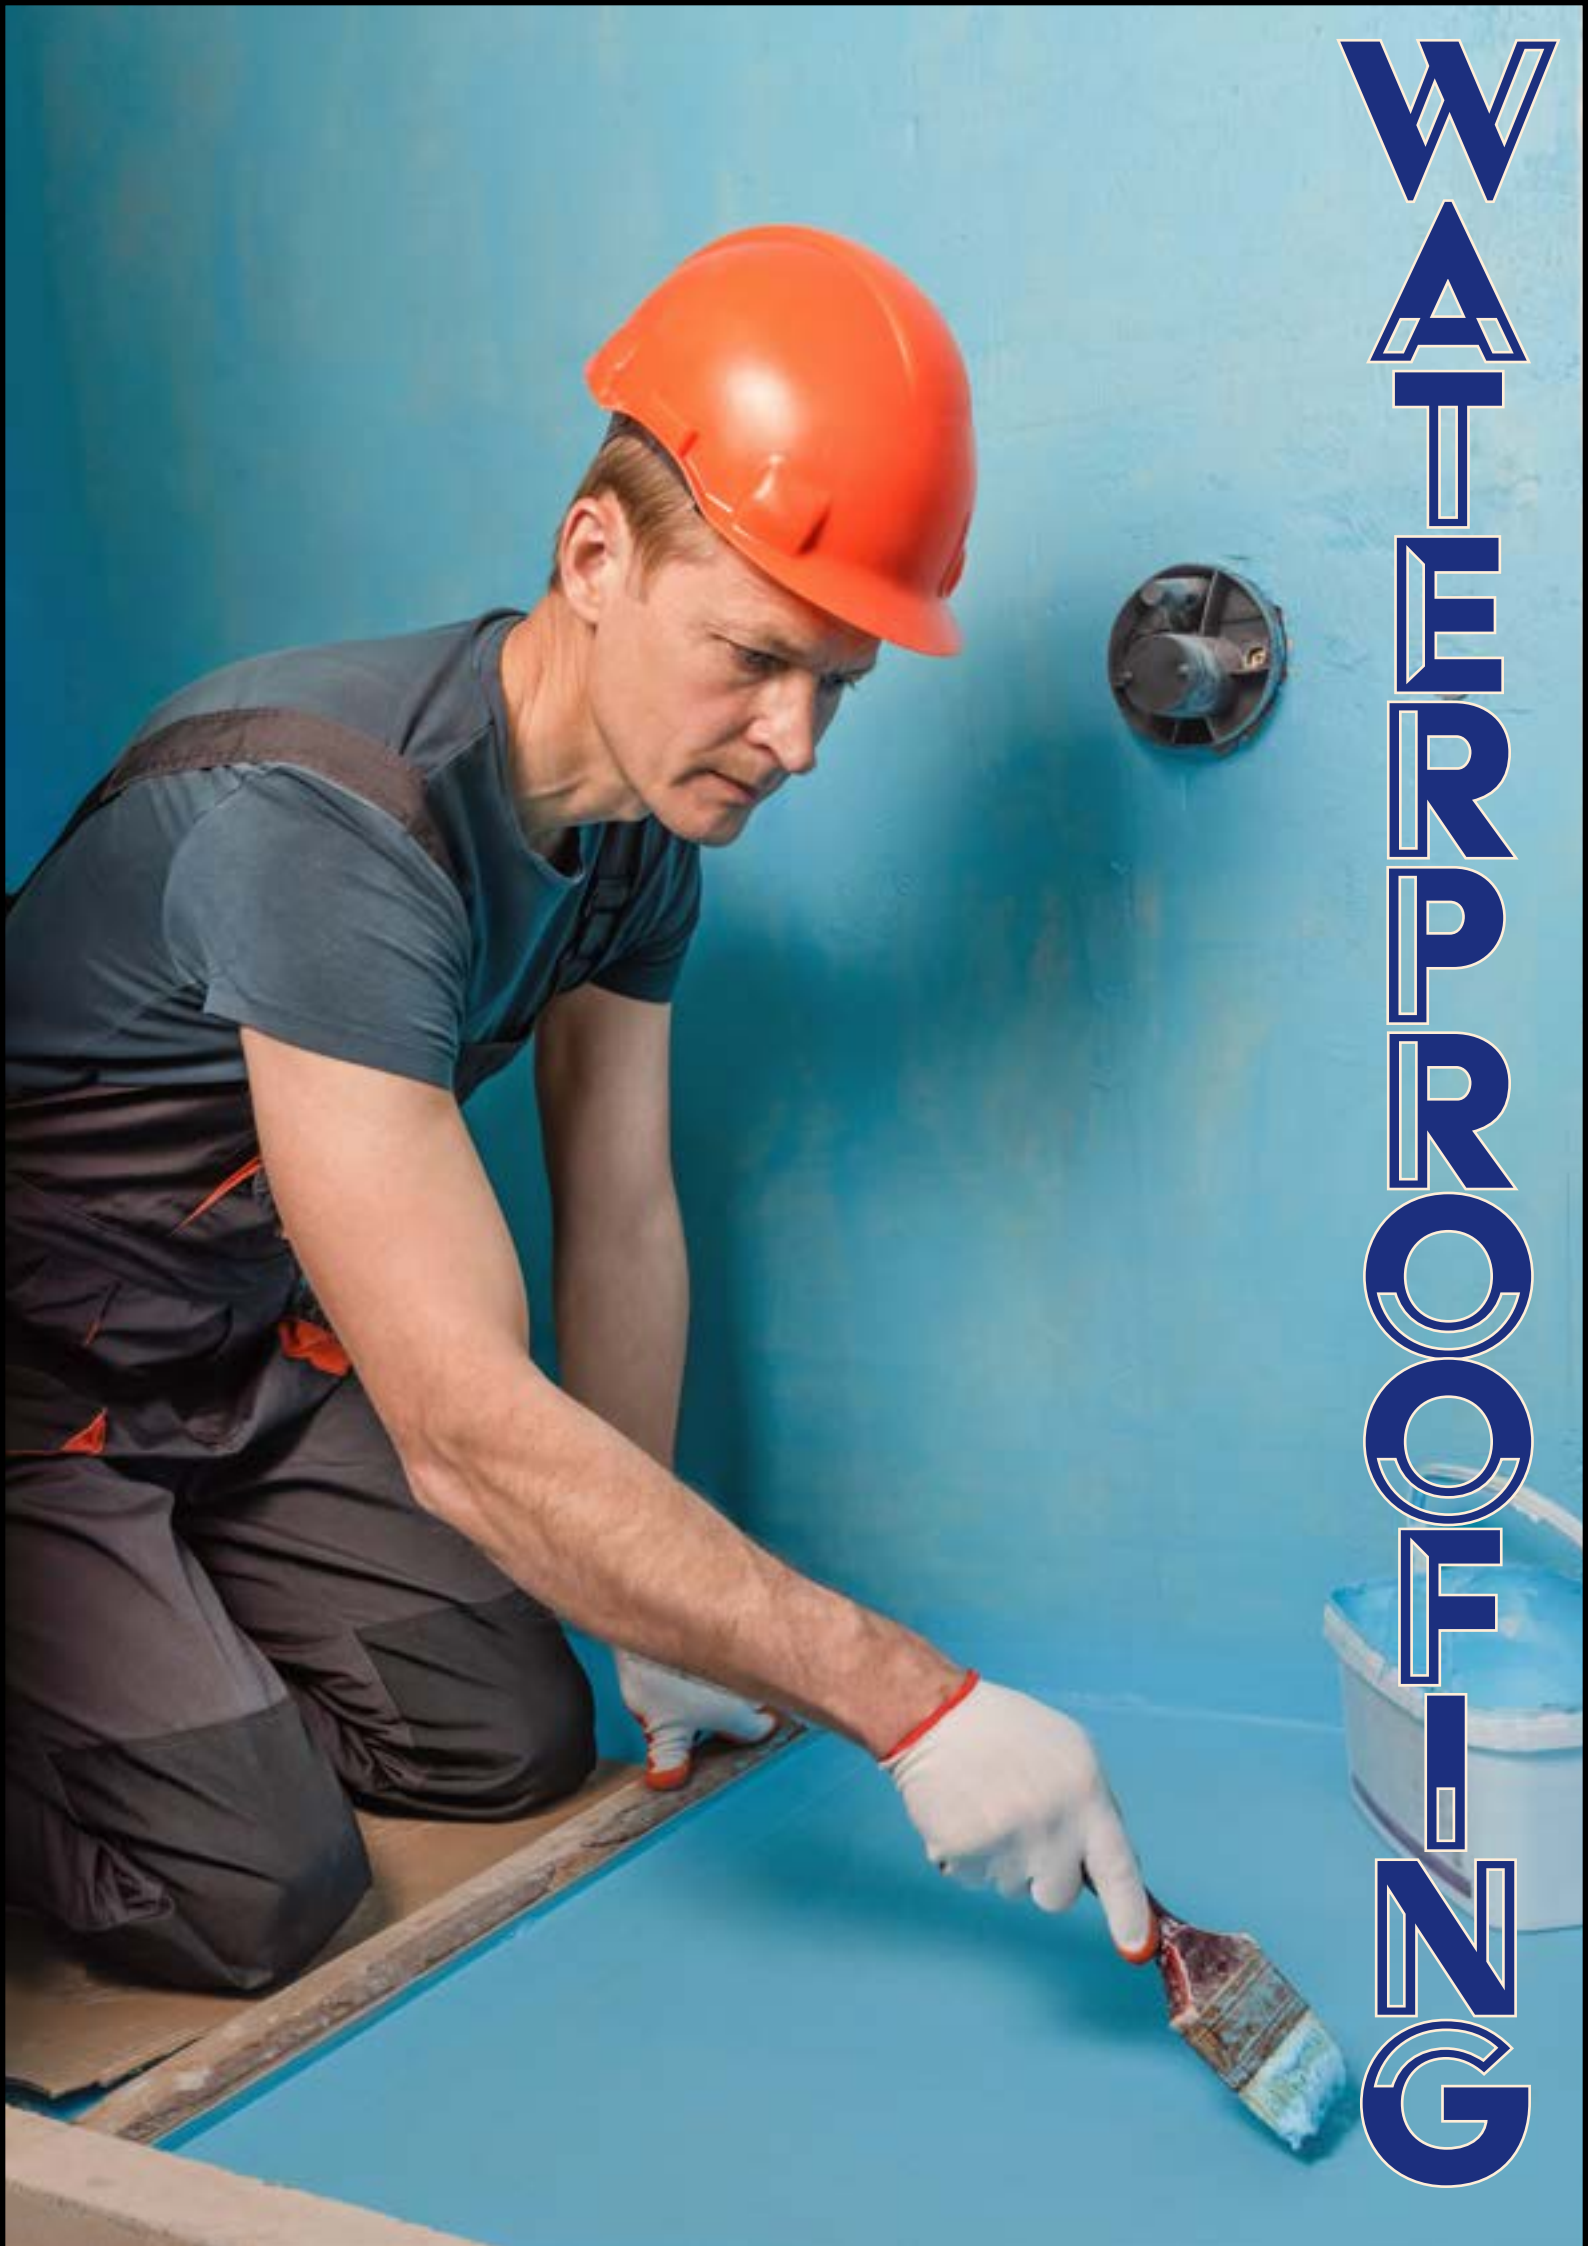

TPA Screed is a pre-blended screed mixture for the installation of cementitious screeds and tile beds. It is a grey powder, consisting of specially graded sand, cement and additives, specifically formulated to create an easy-to-use and apply cementitious screed suitable for the installation of tiles, vinyl and carpet, internal wet areas, balconies, terraces in both bonded and un-bonded screed applications.

VIEW DATA SHEET

TPA Rapid Screed

TPA Rapid Screed is a pre-blended, rapid set, engineered screed mixture for the installation of cementitious screeds and tile beds. The rapid cure allows floor coverings such as tiles, vinyl, and carpet, to be installed faster than traditional sand/cement screeds. Suitable for internal and external floor applications, including wet areas, balconies, terraces, and decks in both bonded and un-bonded screed applications.

ARDEX AUSTRALIA

VIEW DATA SHEET

ARDEX WPM 155 Rapid Plus

ARDEX WPM 155 Rapid Plus is a water based polyurethane acrylic hybrid waterproofing membrane developed for high performance undertile waterproofing for both internal and external applications, for use under tiles or screed environments, is compliant to AS4858 & AS4654 with excellent elongation performance.

VIEW DATA SHEET

ARDEX WPM 002 40kg Kit

ARDEX WPM 002 is a two component, fast drying, modified cementitious waterproofing membrane designed for both internal and external applications, for use under tiles, screeds, and paver/decking systems. Is compliant to AS4858 & AS4654 with excellent durability and elongation performance.

DEMTECH AUSTRALIA

VIEW DATA SHEET

Cureflex SLR2000 Waterproof Membrane 15L

Cureflex SLR2000 waterproof membrane is easily recognisable by its vibrant violet colour. It has strong adhesion properties and remains extremely flexible after curing. It is designed to withstand water retention and permanently wet conditions. When fully cured, it provides an excellent compatible surface for bonding other construction materials such as tile adhesives, renders and screeds.

VIEW DATA SHEET

Cureflex UVX4000 Waterproof Membrane 15L

UVX4000 waterproof membrane is an industrial grade, permanent flexible membrane used as both a waterproof membrane and thermal barrier. It is engineered to reduce heat absorption into buildings, offering energy savings to building owners. It also offers a high build application that provides a flexible seamless finish that can withstand harsh and varying climatic conditions.

VIEW DATA SHEET

Cureflex PCM17 2 Part Waterproof Membrane

Cureflex - 2PART PCM-17 waterproof coating uses a new technique in "cross-collateralisation" in Powdered Polymer Technology (PPT), providing outstanding adhesion properties over a variety of building substrates such as concrete, masonry, Hebel panels, renders, compressed sheeting, cement sheet underlays, villa board, cement based compounds and all grade plaster board.

VIEW DATA SHEET

Cureflex NP140 Waterproof Membrane 15kg

Cureflex® NP140 has been specifically engineered as a flexible, cementitious, waterproofing membrane suitable for use over wet* substrates in a range of positive and negative waterproofing applications including retaining walls, swimming pools, roof areas, balconies and terraces and internal wet areas.

VIEW DATA SHEET

Cureflex PG57 Primer 15L

A high performance liquid additive designed to offer much more than priming substrates. Can be used as a general purpose primer over open porous surfaces and as a liquid additive to cement based construction chemicals. Adding Cureflex PG57 Primer to other products will increase strength, improve flexibility and workability, create high adhesion properties and extend working time.

DEMTECH AUSTRALIA

VIEW DATA SHEET

Cureflex LS151 Primer 15L

Cureflex LS-151 Resurfacing Primer provides a high strength film over non-porous surfaces creating an excellent new surface that allows tiling, rendering, and other construction materials to adhere to without the aid of expensive, hazardous epoxy/polyurethane adhesives. It provides a quick, cost effective alternative solution.

VIEW DATA SHEET

Cureflex Flexiban Rubber Joint Bandage 50m

Cureflex Flexiban range is an innovative new form of high performance flexible bandage used in critical junction points during waterproofing installation. It forms an integral part of waterproofing system that provides excellent protection in high risk areas without altering Membranes performance.

VIEW DATA SHEET

Cureflex Self Adhesive Butyl Tape

Self Adhesive Butyl Tape is easy to use with a peel and stick application and is perfect for critical junction points during waterproofing installation.

VIEW DATA SHEET

Cureflex 90° Internal Corner

Cureflex Flexiban range is an innovative new form of high performance flexible bandage used in critical junction points during waterproofing installation. It forms an integral part of waterproofing system that provides excellent protection in high risk areas without altering Membranes performance.

VIEW DATA SHEET

Cureflex HV124 Silane

Cureflex HV-124 Silane is a premium grade, solvent free adhesive/sealant designed for bonding both porous and non porous materials and products.

VIEW DATA SHEET

Cureflex 270° External Corner

Cureflex Flexiban range is an innovative new form of high performance flexible bandage used in critical junction points during waterproofing installation. It forms an integral part of waterproofing system that provides excellent protection in high risk areas without altering Membranes performance.

DRIBOND CONSTRUCTION CHEMICALS

VIEW DATA SHEET

HYDRATHANE

HYDRATHANE is a one-part, water-based, polyurethane waterproofing membrane which is flexible, tough and fast curing (capable of drying in 6-12 hours @ 23°C @ 50% relative humidity). The cured membrane will remain tough, elastic and can bridge and seal hair-line cracks.

VIEW DATA SHEET

LIQUID FLASH 1

LIQUID FLASH 1 is a premixed, one-pack, water-based, microfi-bre-reinforced acrylic, flexible, waterproofing membrane that is easily applied with a brush to form a resilient waterproof/flashing membrane between different building surfaces. LIQUID FLASH 1 will remain pliable and elastic and will bridge cracks and smooth irregular surfaces. Can be overpainted with water-based acrylic paints to colour match surroundings. The cured membrane is resistant to UV and mild chemical attack.

VIEW DATA SHEET

FLEXIBLE SEALER

FLEXIBLE SEALER is a one-pack, waterproofing membrane applied prior to tiling bathrooms & balconies or left exposed on roofs & balconies. A premixed, one-pack, water-based, brush/rollerapplied, acrylic membrane, which when cured becomes a tough, elastic, heavy duty, UV resistant, waterproof membrane. The cured membrane will remain elastic and can bridge and seal hairline cracks and can resist mild chemical attack.

VIEW DATA SHEET

LIQUID FLASH 2

LIQUID FLASH 2 is a two-pack, fast-drying, microfibre-reinforced, cement/acrylic flexible waterproofing and anti-fracture/crack bridging membrane. It is easily applied to form a resilient waterproof membrane over different building surfaces. Liquid Flash 2 will remain pliable and elastic and will bridge cracks and smooth irregular surfaces.

GRIPSET INDUSTRIES

VIEW DATA SHEET

2P

Gripset 2P is a two component latex cementitious membrane designed for a range of waterproofing applications including internal and external wet areas, immersed and subterranean areas. Gripset 2P provides a unique durable membrane while maintaining flexible and permanent waterproofing properties.

VIEW DATA SHEET

Elastoproof B50

The Elastoproof B50 Joint Band is an innovative detailing system designed for waterproofing and sealing all types of joints, junctions and general areas subject to movement.

VIEW DATA SHEET

Xpresslay Sheet

XpressLay is a high-performance waterproof, decoupling and anti-fracture sheet system used in under tile systems to reduce risk of cracking through finishes associated with structural movement.

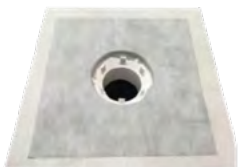

VIEW DATA SHEET

Butyl HD Tape

The Gripset HD Tape is a self adhesive butyl rubber tape used for general detailing in conjunction with BRW-HD sheet membrane applications.

VIEW DATA SHEET

BRW PF Square

The BRW PF Square is a self adhesive sealing square designed for the rapid detailing of leak control flanges and similar penetrations.

VIEW DATA SHEET

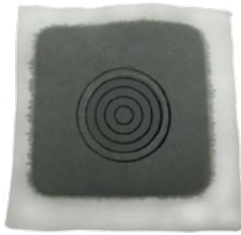

BRW PF Tape

BRW PF Tape is a multi purpose, self adhesive sealing tape providing an instant waterproof seal to the applied surface.

GRIPSET INDUSTRIES

VIEW DATA SHEET

Elastoproof Base Collars

Elastoproof Collars provide a permanent elastic water tight seal over pipes, penetrations and fixtures.

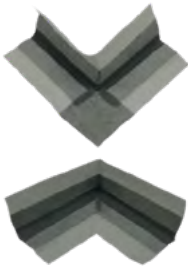

VIEW DATA SHEET

C-1P

Gripset C-1P is a high performance, one component, flexible polymer cementitious membrane designed for a range of positive and negative waterproofing applications. Unique polymer technology provides outstanding waterproofing, adhesion and enhanced crack bridging properties for long term sealing performance and durability.

VIEW DATA SHEET

Elastoproof Prefabricated Corners

The Elastoproof Prefabricated Corners ensure effective detailing and long term protection at critical 90° and 270° corner intersections.

VIEW DATA SHEET

E60

Gripset E60 is a two component water based epoxy compound suitable for use as both a primer and protective

VIEW DATA SHEET

38FC

Gripset 38FC is a next generation, water based, fast curing, fibre reinforced SBR latex membrane designed for waterproofing wet areas, showers, laundries, roofs, terraces, balconies, decks, concrete slabs and general structures that will be covered over with top-pings, tile beds or overlay finishes.

VIEW DATA SHEET

BRW-HD

Gripset BRW HD is a self-adhesive butyl rubber sheet membrane for subterranean waterproofing and multi layered sheet membrane applications. The high tack butyl backing provides a high performance waterproof layer with outstanding adhesion to porous and non-porous surfaces in a wide range of temperature conditions.

GRIPSET INDUSTRIES

VIEW DATA SHEET

BRW-PFN

Gripset BRW PFN is a self adhesive butyl rubber sheet membrane for use in internal and external applications under tiles and top-pings. The high tack butyl backing provides a high performance waterproof layer with outstanding resistance to vibration, movement and flexing.

VIEW DATA SHEET

P39

Gripset P39 is a versatile, high performance membrane based on advanced hybrid polyurethane technology. Suitable as an exposed membrane in external applications, or for use under tiles and other finishes.

VIEW DATA SHEET

11Y

Gripset 11Y is a concentrated SBR latex additive formulated to enhance the performance of cement based compounds

VIEW DATA SHEET

51

Gripset 51 is water based, multi purpose bitumen rubber membrane suitable for underground applications including retaining walls, planter boxes and as a protective coating over timber and metal surfaces.

VIEW DATA SHEET

GP

Gripset GP is a unique general purpose primer used to enhance surface adhesion

VIEW DATA SHEET

OP

Gripset OP is a solvent free specialty primer developed with adhesion enhancing properties over metals and non-absorbent substrates.

GRIPSET INDUSTRIES

VIEW DATA SHEET

Xpress Primer H2O Plus

Gripset Xpress Primer H2O Plus is a unique, 1 component vapour barrier primer designed for use on concrete, screeds and mineral surfaces to protect overlaid coatings and finishes against blistering and delamination associated with residual dampness.

VIEW DATA SHEET

RF Fabric

Gripset RF is suitable for a range of waterproofing applications where liquid membrane detailing or enhanced membrane tensile strength is required.

VIEW DATA SHEET

LS

Gripset LS Roof Coat is hard wearing, non slip top coat designed for external floor surfaces on pitched or flat roofs, podiums and balcony areas. Used as the finish coat over Gripset 38FC and P39 liquid membranes providing a durable membrane system in applications subject to permanent exposure and varying climatic conditions, UV light and foot traffic.

VIEW DATA SHEET

SB MS Polymer Sealant

Gripset SB is an innovative one component adhesive/sealant based on technology that is free of isocyanates, solvents & halogens. The unique properties allow for superior adhesion, flexibility and versatility in a wide range of applications.

VIEW DATA SHEET

Xpress Multi Pro Membrane

Gripset Xpress Multi Pro Membrane is a next generation water-based membrane designed with unique fast cure properties in low temperature and high relative humidity environments. Designed for both under tile and exposed applications subject to UV exposure.

KERAKOLL

VIEW DATA SHEET

Kerabuild Eco Ultracem 5Kg

Kerabuild Eco Ultracem is a specific mortar to immediately block leaks of water from specific points or across foundations, lift shafts, car parks, basement areas, exterior foundation walls, swimming pools, irrigation channels, drains, baths, drinking water collection tanks and reservoirs, tunnels and bridges.

VIEW DATA SHEET

Aquastop Fix 25kg

To be used in conjunction with Aquastop Green Pro and Aquastop tape products. Aquastop Fix develops a fine mixture of extended workability and total hydrophobicity, guaranteeing the water-resistant adhesion of components and accessories of the Green.Pro anti-cracking membrane.

VIEW DATA SHEET

SLC Eco EP21 A+B 7L

Certified, organic resin for the consolidation of absorbent substrates and the covering and waterproofing of absorbent mineral or cement-based substrates with high residual humidity, ideal for use in GreenBuilding. EP21 raises the mechanical resistance of inconsistent substrates and waterproofs them to protect hardwood floors from residual humidity, for a 100% safe laying.

VIEW DATA SHEET

Kerabuild Eco Osmocem Grigio 25Kg

Eco-friendly, osmotic action, mineral covering for the guaranteed, long-lasting protection and waterproofing of concrete structures including foundations, retaining walls and bridges. Kerabuild Eco Osmocem is a single-component, thixotropic covering that complies with the performance requirements of EN 1504-2, surface protection systems (C), resistant to negative hydraulic pressure.

VIEW DATA SHEET

Aquastop 70 50m

140 mm non-woven polypropylene tape with high-adhesion, alkali-resistant waterproof treatment for perimeter joints, to be applied with Aquastop Nanoflex® or Nanodefense. Aquastop 70 seals perimeter joints quickly guaranteeing waterproofing and durability over time.

VIEW DATA SHEET

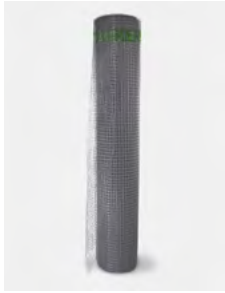

Aquastop Nanosil Eco 290ML

Eco-friendly rigid neutral silane sealant for waterproof sealing of hydraulic and electric systems, through elements and construction elements in pools and in Kerakoll waterproofing systems, ideal for GreenBuilding.

KERAKOLL

VIEW DATA SHEET

Aquastop AR1

Special reinforcing mesh made of alkali.resistant glass fibre to strengthen the eco.friendly Aquastop Nanoflex, Aquastop Flex and WPM and WPM Plus materials. Superior mesh without memory effect.

VIEW DATA SHEET

Aquastop 120 Accessories

Flexible NBR waterproof joint for perimeter and fractionizing joints in waterproofing systems. Aquastop 120 ensures continuous water-proofing even at expansion joints.

VIEW DATA SHEET

Aquastop 120 50m

Flexible NBR waterproof joint for perimeter and fractionizing joints in waterproofing systems. Aquastop 120 ensures continuous water-proofing even at expansion joints.

VIEW DATA SHEET

Aquastop BT 80mm 15m

Butyl adhesive tape coated in high.adhesion, non.woven, alkali.resistant polypropylene with a pre.cut silicone film halfway along the back for perimeter joints that also have a bituminous sheath, PVC, wood, polycarbonate, glass, plastic or metal materials.

VIEW DATA SHEET

Aquastop Flex A+B 24Kg+8Kg

Certified, eco.friendly, two component, anti alkali and chlorine resistant, mineral membrane for flexible waterproofing with high levels of adhesion and durability of substrates before laying with adhesives, ideal for use in GreenBuilding.

VIEW DATA SHEET

Aquastop Green 23m

Uncoupling and anti-cracking waterproof membrane with high adhesion for balconies, terraces and horizontal surfaces before laying ceramic tiles or natural stone; creates a waterproof surface even when overlaid on substrates that are cracked, have not been perfectly cured or might contain vapour pressure due to residual substrate moisture content.

LATICRETE AUSTRALIA

VIEW DATA SHEET

HYDRO BAN®

HYDRO BAN® is a thin, load bearing waterproofing/crack isolation membrane that DOES NOT require the use of fabric in the field, coves or corners. HYDRO BAN is a single component self curing liquid rubber polymer that forms a flexible, seamless waterproofing membrane that bonds to a wide variety of substrates.

VIEW DATA SHEET

HYDRO BAN® SLURRY

HYDRO BAN® SLURRY is a cement based, one component, polymer fortified material that mixes with water and easily applies with brush, roller or trowel. This product can be used on retaining walls, water features, slabs on ground and immersed installations where water resistance or protection from substrate moisture is required.

VIEW DATA SHEET

HYDRO BAN® Fillet & Sealant

HYDRO BAN® Fillet & Sealant is a one component, fast curing, hybrid elastomeric adhesive and sealant. This product is specifically formulated to meet today's Green Building Standards and has excellent adhesion on a wide variety of substrates.

VIEW DATA SHEET

LATAPOXY® Moisture Shield

LATAPOXY® Moisture Shield is a 2 component, roller applied epoxy coating specifically designed to reduce moisture vapour emissions in concrete and other substrates

RLA POLYMERS

VIEW DATA SHEET

1KOMPONENT Fibre Reinforced Waterproof Membrane

1KOMPONENT is one component, a flexible fibre-reinforced waterproof membrane. A specially formulated cementitious base incorporating graded aggregates and polymers produces a highly flexible waterproof membrane capable of withstanding significant flexural strain. It is suitable for 5 bar positive and 1.5 negative bar pressure.

VIEW DATA SHEET

2 Part Cementitious Waterproofing Membrane

2 PART is a cementitious, two-part waterproofing membrane. 2 PART is based on high alumina, fast-setting cement. It is mixed with a high solids water resistant pure acrylic. 2 PART combines the quick drying and excellent adhesion characteristics of traditional 2-part membranes with the superb toughness, elongation, and flexibility of modern acrylic membranes.

VIEW DATA SHEET

RLA Porous Primer

RLA POROUS PRIMER is a fast drying, water based acrylic primer designed to promote optimal adhesion of RLA waterproof membranes, tile adhesives and repair mortars over porous substrates.

VIEW DATA SHEET

RLA Non Porous Primer

RLA Non Porous Primer is a rapid drying solvent free low VOC water based acrylic primer. For use over porous and non porous substrates such as ceramic tiles, painted surfaces (waterbased only) and sealed or burnished concrete floors.

VIEW DATA SHEET

Moisture Seal Epoxy Waterproofing System

RLA Moisture Seal is a high-performance 2-part water-based epoxy waterproofing system designed as a water and vapour-proof coating under waterproofing systems, coatings, tiles, resilient and timber flooring. It is intended for floor and wall applications requiring durability, water and chemical resistance.

RLA POLYMERS

VIEW DATA SHEET

PU850 Liquid Waterproofing Membrane

RLA PU850 is a thixotropic, one part, liquid applied, moisture cured polyurethane waterproofing membrane, suitable for waterproofing most applications. RLA PU850 cures to form a seamless, tough, durable, elastomeric waterproofing membrane. RLA PU850 has excellent adhesion to most suitably primed building substrates and is suitable for above and below ground applications. Used in conjunction with RLA Aliphatic Top Coat where UV Stable applications are needed.

VIEW DATA SHEET

RLA Aliphatic Top Coat

RLA ATC is a single pack, liquid applied, aliphatic polyurethane waterproof topcoat designed for application over the RLA PU850 membrane for external, exposed membrane applications. The moisture curing aliphatic technology provides strong protection against UV, while maintaining a durable, highly flexible seamless finish

VIEW DATA SHEET

WPM Class III Liquid Waterproofing Membrane

RLA WPM is a waterborne flexible waterproof membrane designed for use under tiled finishes that is capable of accommodating expected structural movement. RLA WPM is a certified Class III membrane and is compliant to AS4858:2004: "Wet Area Membranes", when applied in accordance to AS3740:2010 "waterproofing Wet Areas in Residential Buildings".

VIEW DATA SHEET

WPU Class III Liquid Waterproofing Membrane

RLA WPU is an elastomeric one-part polyurethane/Acrylic fibre reinforced water-based membrane developed as a high-performance internal/ external membrane for most general waterproofing applications. It is suitable for external applications where a UV stable, occasional trafficable membrane is required.

VIEW DATA SHEET

PrimerPU Solvent Based Primer

RLA PRIMER PU is a solvent-based primer with a transparent appearance, specifically designed for use with the RLA Flex-Pro polyurethane sealant range, and RLA PU 850 liquid waterproof membrane to ensure adhesion to porous substrates. Especially with water-immersed applications.

RLA POLYMERS

VIEW DATA SHEET

MAX SMP 25

Max GRAB SMP is ideal for a vast range of interior and exterior applications and may be applied to damp substrates. Applications include: Sealing/bonding in the plumbing industry; joints in bathroom in kitchens; and most types of wall cladding, direct wall studing, internal wall surfaces or timber battens.

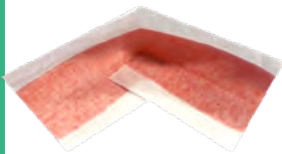

VIEW DATA SHEET

Flexiband external corner

Waterproofing external corners providing maximum protection at the most volatile areas, ensuring a quality watertight seal that accommodates movement in a variety of different waterproofing applications. Made from a unique grade of rubber, providing an elastic seal to line the wall / floor junction, forming a rupture resistant seal at corner intersections.

VIEW DATA SHEET

Flexiband internal corner

Waterproofing internal corners providing maximum protection at the most volatile areas, ensuring a quality watertight seal that accommodates movement in a variety of different waterproofing applications. Made from a unique grade of rubber, providing an elastic seal to line the wall / floor junction, forming a rupture resistant seal at corner intersections.

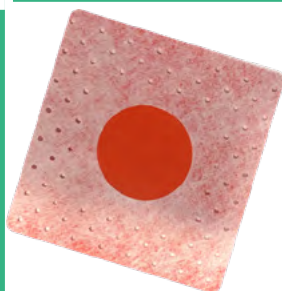

VIEW DATA SHEET

Waterproof tape

An open weave polyester reinforcing fabric for use of reinforcing RLA waterproofing membranes. Generally 2 Litres of waterproofing membrane per square metre of product is required to properly saturate and cover scrim tape.

VIEW DATA SHEET

Flexiband tap sleeves

Tap Sleeve enhances the seal around penetrations such as pipes, drainage outlets, cabling and any surface fixtures by protecting against movement, vibration and cracking. It provides a permanent tight rubber seal against water ingress enabling penetrations to withstand a variety of movement conditions without compromising the membrane seal.

VIEW DATA SHEET

RLA Plastinex

RLA PLASTINEX is a premium acrylic polymer concentrate designed to enhance the performance, durability and general properties of cement based compounds in a range of applications.

SIKA AUSTRALIA

VIEW DATA SHEET

110 Secure Proof

A premium performance, flexible class III, ready to use, fibre reinforced, water-based polyurethane waterproofing membrane designed for internal and external areas including wet areas, balconies, terraces, and non UV exposed above ground external applications.

VIEW DATA SHEET

Sheet Membrane System

A flexible, class III, crack-bridging, isolating and waterproofing sheet membrane. Made from highly tear resistant Polyethylene, double sided fleece lamination for rapid installation of waterproofing and tiling. SCHÖNOX® AB can be used in normal and high loaded commercial wet areas, steam rooms and swimming pools. SCHÖNOX® AB is suitable for heated floors and has excellent crack bridging properties. System components AB waterproofing sheet membrane, iFIX adhesive and ST sealing tape.

VIEW DATA SHEET

010 Secure Prime

A high performance, ready to use, primer with efflorescence inhibiting properties suitable for porous and dense substrates. SikaTile®-010 Secure Prime helps prevent efflorescence by reducing the porosity of concrete, screeds and renders with its unique crystalline technology. SikaTile®-010 Secure Prime is suitable for use internally and externally on both wall and floor applications.

VIEW DATA SHEET

015 NPP

A flexible, water-based, non-porous primer specifically designed with superior bond enhancing properties for use on existing tiles, smooth and non porous surfaces, without the need for mechanical surface preparation.

VIEW DATA SHEET

111 Rapid proof

A rapid drying, water-based class III flexible waterproofing membrane designed for wet areas, balconies and other under tile and stone waterproofing applications.

WPA

VIEW DATA SHEET

WPA 360 Primer

WPA 360 is a water based, low solids, fast drying primer used in conjunction with our range of water-based membranes including WPA 200, WPA 230UV, WPA 400, WPA 500 or WPA Rapid waterproofing membranes.

VIEW DATA SHEET

WPA 460

WPA 460 is a two-part water-based epoxy primer used to seal concrete and masonry surfaces. WPA 460 cures to a water-resistant coating with excellent adhesion to most common building substrates.

VIEW DATA SHEET

WPA 560 Moisture Barrier

WPA 560 Moisture Seal is a two part, water-based epoxy primer designed as a water and vapour proof coating under waterproofing membranes, ceramic tile adhesives*, levelling compounds* and timber floors. (*additional priming required).

VIEW DATA SHEET

WPA 400

WPA 400 is an elastomeric, fibre reinforced waterproofing membrane based on high performance polymer technology. Designed for a range of undertile waterproofing applications, WPA 400 offers excellent adhesion and outstanding low vapour transmission properties. Fully compatible with polymer modified cement-based tile adhesives, screeds and renders. The unique formulation provides excellent workability and film build.

VIEW DATA SHEET

WPA SB Primer

WPA SB Primer is a fast drying, solvent based primer, with exceptional penetrating properties. WPA SB Primer is designed to assist in improving adhesion on porous and nonporous substrates. It significantly enhances the adhesion of subsequent coatings and membranes.

VIEW DATA SHEET

WPA 230UV

WPA 230UV is an elastomeric, one-part, fibre reinforced, water based polyurethane membrane, suitable for waterproofing shower recesses, bathrooms, laundries, decks, balconies and rooftops.

WPA

VIEW DATA SHEET

WPA 500

WPA 500 is a waterborne flexible waterproofing membrane specifically designed for use under ceramic and stone tile finishes. The unique formulation provides excellent workability and film build.

VIEW DATA SHEET

WPA Rapid

WPA Rapid is a water based, flexible waterproofing membrane, utilising next generation, self-crosslinking technology, which enables the membrane to achieve cured properties rapidly. WPA Rapid is designed for use under tiles in internal and exterior applications.

VIEW DATA SHEET

WPA 100

WPA 100 is a single component, fibre reinforced, rapid drying, cementitious waterproofing membrane. It is based on special cements, modified with polymers, selected graded aggregates and special waterproofing additives to produce a flexible waterproofing compound. WPA 100 is suitable for both positive and negative side waterproofing applications and is capable of withstanding significant strain.

VIEW DATA SHEET

WPA 200

WPA 200 is a highly flexible, two-part, rapid drying, cementitious waterproofing membrane, specifically designed for use under ceramic and stone tile finishes in bathrooms, balconies, roofs and some swimming pools. WPA 200 combines the fast drying and excellent adhesion characteristics of traditional two-part membranes with the outstanding toughness, elongation and flexibility of next generation acrylic waterproofing membranes. It is UV resistant and is suitable for light maintenance traffic.

VIEW DATA SHEET

WPA 992

WPA 992 is a thixotropic, one-part, liquid applied, moisture cured polyurethane waterproofing membrane, suitable for waterproofing most non-exposed applications. WPA 992 cures to form a seamless, tough, durable, elastomeric waterproofing membrane. WPA 992 has excellent adhesion to most suitably primed building substrates and is suitable for above and below ground applications.

WPA

VIEW DATA SHEET

WPA 1500

WPA 1500 is a next generation, high performance decoupling and waterproofing sheet membrane for use under tile and stone installation in commercial and residential applications. WPA 1500 is specifically designed for use in areas where differential movement needs to be mitigated. WPA 1500 consists of a base layer of non-woven polypropylene fabric anchoring fleece, thermally welded to a high density polyethylene, water impermeable core. The top layer consists of non-woven polypropylene fabric, thermally welded to the core, providing an excellent key for subsequently applied tiles adhesive systems

VIEW DATA SHEET

WPA 992UV

WPA 992UV is a self-levelling, one-part, liquid applied, moisture cured polyurethane waterproofing membrane, suitable for waterproofing most applications. WPA 992UV cures to form a UV stable, seamless, tough, durable, elastomeric waterproofing membrane. WPA 992UV has excellent adhesion to most suitably primed building substrates and is suitable for above and below ground applications.

VIEW DATA SHEET

WPA Aqualay

WPA AQUALAY is an innovative, high performance, flexible, easy to install new generation sheet waterproofing membrane system. The sheet itself consists of an EVAC core with a laminated non-woven geotextile fleece on either side of the central core. This unique system allows surface finishes including tiles, screeds and topping to be installed within hours of the membrane installation.

VIEW DATA SHEET

WPA FC

WPA FC is a high performance, fast cure, one component polyurethane sealant. When cured it will form a tough, flexible seal and bond, capable of cyclic expansion and compression movement. Joints or fabrications formed with this sealant can be expected to extend and compress a total of 50% ($\pm 25\%$) of original joint dimensions to ASTM C719.

VIEW DATA SHEET

WPA SPUR

WPA SPUR is a high quality, professional, universal, low modulus sealant based on hybrid technology. WPA SPUR cures under the influence of atmospheric moisture and is free of solvents and isocyanates with a very low VOC content. When cured it forms a tough, flexible seal and bond, capable of cyclic expansion and compression movement. Joints or fabrications formed with this sealant can be expected to extend and compress a total of 50% ($\pm 25\%$) of original joint dimensions to ASTM C719.

WPA

VIEW DATA SHEET

WPA MS

WPA MS is a single component, moisture cured silane modified hybrid sealant free of solvents and isocyanates, with a very low VOC content. When cured it forms a tough, flexible seal and bond, capable of cyclic expansion and compression movement.

Everyone could use a bit of guidance.

At Tile Today Digital, we constantly look for the information the tile industry needs — from the latest ABS stats, to product releases, new trends in design, and building requirements. We also highlight the people who make the tile industry what it is.

We publish that information on our website, at tiletodaydigital.com.au.

Once a fortnight, we package up links to the most important articles, and send those to you in an e-newsletter.

It's that simple.

VIEW DATA SHEET

SPECTRUM FUTURA Lightweight Coloured Grout

SPECTRUM FUTURA Lightweight Coloured Grout. Engineered and manufactured in Australia, its unique lightweight formula has up to 50% better coverage compared to standard grouts. Hydrophobic and mould resistant. Easy application and only one wash-off saves up to 3 hours on grouting a standard size bathroom. Matching colours silicone is available.

VIEW DATA SHEET

SPECTRUM FUTURA S-25 Acetic Cure Silicone

SPECTRUM FUTURA S-25 is a premium, sanitary grade, highly flexible acetic cure silicone sealant ideal for internal and external tiling applications. S-25 has superior adhesion with 25% joint movement capability. S-25 has mould resistant properties. Suitable for adhering to ceramic tiles, porcelain, glass, aluminium, fibre glass, plastics, painted surfaces, and other non-porous surfaces. Colour options available to match Spectrum Futura lightweight grout.

ARDEX AUSTRALIA

ARDEX AUSTRALIA

VIEW DATA SHEET

FG8

A smooth, flexible cement-based grout with improved colour integrity, ARDEX FG8 can be used for tile joints 1mm to 8mm wide, on walls and floors. It contains ARDEX Grout Shield to combat mould growth. Improved workability helps ensure flush joints, which is most noticeable with rectified edged tiles. ARDEX FG8 is available in 20 designer colours, and is suitable for grouting indoors and out.

VIEW DATA SHEET

WJ50

ARDEX WJ50 is a sanded, cement-based grout for internal or external wall and floor tiling. It is ideal for use in joints from 2mm up to 50mm wide without shrinking. A special additive is included to combat efflorescence and achieve superior colour consistency. ARDEX WJ50 is exceptionally easy to use, available in a range of colours and is suitable for both commercial and domestic applications.

VIEW DATA SHEET

FS-DD

ARDEX FS-DD is a non-sanded cement-based, wall and floor grouting compound which is specially designed to be water and dirt resistant making it ideal for wet areas such as showers. ARDEX FS-DD is easy to apply and fast drying, with final cleaning able to be completed 24 hours after initial wash off with no residue left on the tile surface. It is further protected from mould growth due to the addition of ARDEX Grout Shield which combats fungal and algal growth. ARDEX FS-DD is suitable for use internally or externally and is especially suited to surfaces prone to scratching such as porcelain.

VIEW DATA SHEET

SE Silicone

ARDEX SE is an acetoxysilane curing silicone for applications such as movement joints (between tiles), internal corners (tiled wall and floor) and connecting joints between tiled surface and benchtops, bath edges, cupboards and splashbacks. ARDEX SE Silicone is flexible with up to 25% movement, suitable for use in showers and is UV resistant for internal and external applications. ARDEX SE bonds well to ceramic tiles, glass, enamel, anodized aluminium, granite, porcelain, laminated benchtops and sanitary acrylics.

ARDEX AUSTRALIA

VIEW DATA SHEET

ST Silicone

ARDEX ST Silicone is a unique, neutral curing silicone sealant with good adhesion properties yet is easy to apply and smooth. It is also characterised by its antifungal agents to combat mould growth and its non corrosive properties. ARDEX ST Silicone, is ideal for use with sensitive natural stones, for use in immersed applications, such as swimming pools and can also be used on glazed and unglazed tiles, enamel, laminated kitchen benches, aluminium, concrete, glass, procelain, waterproofing membranes, wood and sanitary acrylics.

VIEW DATA SHEET

EG15

ARDEX EG15 is a high performance 2 part epoxy grout designed for situation that require strict standards of hygiene, high chemical and physical resistance. ARDEX EG15 is exceptionally easy to clean up during application. It can be used in joints from 1.5mm to 15mm wide on walls and floors. ARDEX EG 15 is ideal for wet areas including swimming pools and hydrotherapy pools, internal and external applications and is available 8 colours.

DRIBOND CONSTRUCTION CHEMICALS

DRIBOND CONSTRUCTION CHEMICALS

VIEW DATA SHEET

EPEGROUT

A three-component, water-washable, chemical resistant, epoxy tile grout for joints up to 3mm. To be applied by an experienced two/ three-man team, one applying the grout and the others cleaning up.

VIEW DATA SHEET

EPEGROUT ULTRA

An easy clean off, solvent-free, pool grade epoxy grout with chemical and physical resistance combined with easy application properties. To be applied by an experienced two/ three-man team, one applying the grout and the others cleaning up.

VIEW DATA SHEET

EPEGROUT TRADE

A water-based, commercial, sanded epoxy tile grout for joints 2mm to 10mm. To be applied by an experienced two/ three-man team, one applying the grout and the others cleaning up.

VIEW DATA SHEET

GROUT SHIELD

A water based silicone sealer that repels water and shields the grout from contaminants and staining. Does not change the appearance of the grout.

VIEW DATA SHEET

KEMGROUT FLEXIBLE

A dense, smooth, hard-wearing, flexible, polymer-modified, portland cement floor and wall grouting compound with resistance to mould and fungi growth for joints up to 5mm wide. Mix grout with Primebond (dilute Primebond 50:50 with water) to improve impact, flexural strength and increase resistance to staining and discolouration.

DRIBOND CONSTRUCTION CHEMICALS

VIEW DATA SHEET

KEMGROUT SANDED

A fine-finish, dense, hard-wearing, waterproof, Portland cement, floor and wall grouting compound with resistance to mild chemical and acid attack for joints 2mm to 10mm wide. Mix grout with Prime-bond for swimming pools or to improve impact, flexural strength and increase resistance to staining and discolouration in general.

PERMACOLOR® Select

PERMACOLOR® Select is an advanced high performance cement grout that offers the industry's first dispersible dry pigment solution. Designed for virtually all types of residential and commercial installations and offers optimum performance on the most demanding exterior or interior applications.

VIEW DATA SHEET

PERMACOLOR® Grout

The maximum performance available in a cement-based grout. Provides consistent colour, and antimicrobial protection to resist stain-causing mould and mildew. PERMACOLOR® Grout is easy to install - just mix with water. Ideal for floors and wall in both interior and exterior applications.

VIEW DATA SHEET

PERMACOLOR® NS

PERMACOLOR® NS is an ultra-premium, factory prepared, polymer fortified, non-sanded cement based grout designed for highly delicate surfaces such as polished marble, soft glass and metals. PERMACOLOR NS is mixed with water only.

VIEW DATA SHEET

SPECTRALOCK® Pro Premium Grout

SPECTRALOCK® PRO Premium Grout* is a patented, high performance epoxy grout which offers excellent colour uniformity, durability, stain protection, and beautiful, full grout joints in an easy to-use, non-sag formula.

VIEW DATA SHEET

SPECTRALOCK® 2000 IG

SPECTRALOCK® 2000 IG is a highly chemical resistant industrial grade epoxy grout for: ceramic tile, pavers, floor brick, packing house tile, and stone. SPECTRALOCK 2000 IG is supplied as factory proportioned kits consisting of epoxy resin, hardener, and chemical resistant silica filler.

HYDRO BAN® Fillet & Sealant

HYDRO BAN® Fillet & Sealant is a one component, fast curing, hybrid elastomeric adhesive and sealant. This product is specifically formulated to meet today's Green Building Standards and has excellent adhesion on a wide variety of substrates. Particularly for use under HYDRO BAN Waterproof Membrane as a transition fillet and crack filler.

VIEW DATA SHEET

LATASIL™

LATASIL™ sealant is a high performance, one component, neutral cure, 100% silicone sealant designed for ceramic tile & stone applications.

VIEW DATA SHEET

Wide Joint XL

WIDE JOINT XL is a high performance cementitious grout, suitable for internal and external use that accommodates a joint from 2mm up to 60mm wide and provides a grout joint that is dense and hard. WIDE JOINT XL Grout is colour consistent and resists shrinkage.

RLA POLYMERS

VIEW DATA SHEET

MAX SMP 25

Max GRAB SMP is ideal for a vast range of interior and exterior applications and may be applied to damp substrates. Applications include: Sealing/bonding in the plumbing industry; joints in bathroom in kitchens; and most types of wall cladding, direct wall studing, internal wall surfaces or timber battens.

VIEW DATA SHEET

FirePro FR

Firepro FR is an acoustic and intumescent sealant which expands on exposure to heat to form a fire-resistant seal, preventing the spread of fire throughout a building. It is used to seal around and between most types of building materials to "compartmentalize" a fire within sections of a structure. Firepro FR will expand to form an intumescent "plug" which prevents fire/heat/smoke from passing through joints.

VIEW DATA SHEET

Gap Filler

Gap Filler Acrylic Sealant is a high-quality acrylic sealant for sealing cracks and joints in timber and plaster around doors and window frames, wall and ceiling joints, masonry and around baths, sinks and sanitary fittings. Gap Filler can be painted and papered over.

Silikön 400LM Matte Cladding

silikön 400LM is a high-performance, 100% neutral cure matte silicone sealant & adhesive. Designed for cladding, glazing and façade installations, silikon 400LM provides a soft, discreet finish to complement adjoining building elements and surfaces.

VIEW DATA SHEET

Silikön 300 Matte Glazing

silikön 300 is a premium, high-strength neutral cure silicone sealant designed to provide superior durability and adhesion in a wide range of glazing applications. Formulated for professional weather sealing and numerous other trade applications where long term durability and performance is paramount

VIEW DATA SHEET

Silikön 600

silikön 600 is a premium grade , fast curing, high strength 100% neutral curing silicone sealant & adhesive. Designed for glazing, industrial, and automotive sealing, silikon 600 is ideal for applications where extra high body, quick skin time, high early strength development and long-term reliability are essential.

VIEW DATA SHEET

Silikön 700 Wet Area

silikön 700 is a high quality, 100% neutral curing silicone sealant with in-built inhibitors to help prevent mould growth in warm, wet, humid conditions and general areas subject to continuous moisture. Ideal for use in bathrooms, high traffic wash areas, shower screens, kitchens & wash basins

Natural Finish Stone Sealer

Rockstar Natural Finish Stone Sealer utilizes the latest in sealing technology to produce a sealer that offers high stain resistance while not altering the appearance of the stone. It protects against water and oil based contaminants while permitting vapour and salt transmissions. The product suits limestone, sandstone, marble and concrete. Sandstone that has been treated with Rockstar Natural Finish Stone Sealer reduces water intake by 97%.

VIEW DATA SHEET

Bluestone Sealer

Rockstar Bluestone sealer has been formulated using the latest in stone sealing technology. Penetrating sealer for bluestone and basalt that doesn't alter the appearance of the stone. It offers high stain resistance to water and oil based contaminants.

VIEW DATA SHEET

Green Star Sealer

Rockstar GREEN STAR SEALER is a water-based penetrating sealer formulated for use on a wide variety of mineral-based floor finishes including natural and man-made stone, tiles, concrete and terracotta. Once applied the surface will be protected against the ingress of oil and water borne staining substances.

VIEW DATA SHEET

Dense Stone Sealer

Rockstar DENSE STONE SEALER is a solvent-based sealer used to protect against staining on dense, hard to permeate stones and tiles. DENSE STONE SEALER protects dense stone and tile substrates against environmental staining. The ingress of staining substance is retarded, making the surface easier to clean.

VIEW DATA SHEET

Anti Slip

Rockstar Anti-Slip is a treatment for natural stone, porcelain and ceramic tiles. Providing tiles with anti-slip properties and minimal change to the tile's appearance.

ROCKSTAR SEALING SOLUTIONS

VIEW DATA SHEET

Stone Enhancer

Rockstar Stone Enhancer is a penetrating sealer used to enrich the colour of worn, faded or damaged stone. Rockstar Stone Enhancer is very popular in the polished concrete community and used frequently by customers who wish to enhance their basalt/bluestone tiles.

VIEW DATA SHEET

Neutral Cleaner

Rockstar Neutral Cleaner is a fully biodegradable pH neutral cleaner which is safe for use on all surfaces. Ideal for maintaining sealed natural stone, concrete, terrazzo, sandstone and glazed ceramic tiles and is excellent for daily stone, grout and tile cleaning.

VIEW DATA SHEET

Stone Clean Plus

Rockstar Stone Clean Plus is a high alkaline cleaning agent ideal for removing built up dirt and grime while leaving no residue. Ideal for use on porcelain tiles, natural stone and glazed ceramic tiles.

VIEW DATA SHEET

Miracle Clean

Rockstar Miracle Cleaner is a heavy duty cleaner for built up dirt and grime. Rockstar Miracle Cleaner will dissolve soap scum, grease and fat from concrete, terrazzo, sandstone and limestone. It removes graffiti and is an excellent grout cleaner.

VIEW DATA SHEET

Lift Off

Rockstar Lift Off has been designed to remove cement smear, grout haze, rust and hard water stains and can be used diluted or neat depending on the condition of the floor.

ROCKSTAR SEALING SOLUTIONS
